<sup>1</sup> NOTE from Barry Wisset about the reason for this structure: The structure of the FTR Board is a remnant of the old Rochester Telephone Open Market Plan, put in place ahead of the Telecom Act to get Roch Tel out from under rate regulation of the NYS PSC for regulated services. The quid pro quo was that Roch Tel had to lease capacity on its network at wholesale prices to its competitors. An independent Board for the LEC was a required part of the Plan.

The Open Market Plan is no longer in effect and the requirement for an independent board no longer exists. There have been many discussions about bringing FTR into the mainstream with regard to Board structure, but Rochester leadership has always felt there was a continuing value in maintaining the FTR Board which is composed of influential business and community leaders, many of whom are connected to our larger customers.
