

Self-Generation Incentive Program (SGIP)

- Initiated 2001; longest running incentive program in U.S.
- Storage participation has grown significantly since 2016

- CPUC adopted Decision 19-09-027 on September 12, 2019
 - “Equity Resiliency Decision”
 - Increases incentive levels and addresses PSPS

New SGIP Equity Resiliency Storage Budget

Created by Decision 19-09-027

Funding:	\$100 million
Incentive:	<p>\$1.00/watt-hour (Wh). Covers ~full cost of most energy storage</p> <p>- A median 13.2 kWh, two-hour residential storage system has a median cost of \$13,500. Thus, the incentive covers ~98% of costs.</p>
Supports resiliency:	SGIP incentives adjusted to encourage longer duration energy storage
Equipment Eligibility:	<ul style="list-style-type: none"> • Achieve GHG emission reductions • Cycle > 52 times/yr (res.); >104 times/yr (non-res.) • Able to island & operate during outage
Start Date:	Early opening for small residential systems: applications can be submitted 2/18/20. All other systems will be able to apply no later than 4/1/20.

New SGIP Equity Resiliency Storage Budget
