

Resiliency and Microgrids Working Group WebEx Meeting

Subject: Alternatives to a Multi-property Tariff

February 22, 2021

2:00 – 4:00 PM

WebEx (Slide View/Submit Written Questions)

No registration is required.

*This workshop will be held via WebEx. **All workshop participants will be muted during the introduction and speaker presentations.** During the discussion, participants may use either the “raise your hand” WebEx button online or the Chat window to comment/ask questions. Call-in users may dial *3 to raise their hand. Questions/comments will be addressed in the order received.*

Background:

Rulemaking 19-09-009 facilitates the commercialization and deployment of microgrids while prioritizing system, public, and worker safety and avoiding shifting costs between ratepayers. On September 12, 2019, the Commission initiated this Rulemaking to design a framework surrounding the commercialization of microgrids associated with Senate Bill (SB) 1339 (Stern, 2018), as well as to account for the Commission’s commitment toward utilizing additional technologies and activities that may be useful for achieving overall resiliency goals.

As part of the rulemaking, the CPUC organized a working group to facilitate thoughtful and informed discussions to continue to support the goal of resiliency and the commercialization of microgrids. Specifically, the RMWG will further explore issues not previously addressed or under

current consideration by the Commission. The topics may be subject to change and reprioritization as the discussions evolve over the course of the working group meetings.

Purpose of the Meeting:

- Follow up on the list of tariff components and the associated discussion prompts designed to help guide participant's tariff discussion prompt and questions proposals.
- Discuss alternatives to a multi-property tariff that would enable multi-property, multi-customer microgrid projects. This includes microuilities, cooperatives, and the own use doctrine.

Meeting Agenda:

- I. Introduction (CPUC Staff) 2:00 – 2:05**
- WebEx logistics, agenda review
- II. Discussion Prompts Follow Up (CPUC Staff) 2:05 – 2:35**
- Revisit the list of tariff components and the associated discussion prompts to see if there are any follow up questions and comments from attendees.
 - Solicit tariff development-related resources from members that may be useful.
 - General Discussion
- III. Alternatives to a Multi-Property Tariff 2:35 – 3:50**
- Discuss alternatives to a multi-property tariff that would enable multi-property, multi-customer microgrid projects. This includes microuilities, cooperatives, and the own use doctrine. **There will time allocated for discussion after each sub-topic.*
 - Microuilities and Cooperatives
Presenter: CPUC Staff
 - Own Use Doctrine
Presenter: Alexandra “Sascha” von Meier
Adjunct Professor, Dept. of Electrical Engineering and Computer Science,
UC Berkeley
Director, Electric Grid Research, California Institute for Energy and
Environment
Faculty Scientist, Lawrence Berkeley National Laboratory, Grid Integration
Group
 - General Discussion

IV. Closing Remarks, Adjourn

3:50-4:00

- Provide information on the next meeting
