Background: On December 18, 2023, the Commission issued a Scoping Memo establishing the issues to be addressed in Track 1 (of 3) of the RA Rulemaking, including the 24-Hour Slice-of-Day (SOD) Framework, the SOD Planning Reserve Margin (PRM), Unforced Capacity Methodology (UCAP), Demand Response (DR) Load Impact Protocols (LIP) Simplification, RA Compliance and Penalties, and other time-sensitive issues that can be implemented in time to impact the 2025 compliance year, including refinements to the Central Procurement Entity (CPE) structure.

On January 19, 2024, 15 parties filed proposals and PG&E filed a Report on behalf of the LIP Simplification Working Group. On February 5, 2024 the ED issued its Report on the SOD Framework. On February 14, 2024 ED hosted a workshop on ED and Parties’ proposals; however, due to time constraints, that workshop did not cover all items on the agenda. This workshop is scheduled to discuss the remaining topics.
