

Settlement Year 6 – Second Quarter
Progress Report to California Public Utilities Commission
Electric Vehicle Charging Station Project

For the period June 6, 2018 through September 5, 2018 (the Reporting Period)
Submitted October 5, 2018 by NRG Energy, Inc. on behalf of the Dynegy Parties¹

EXECUTIVE SUMMARY

NRG and EVgo continue to implement the settlement agreement to enable electric vehicle (EV) deployment in California through the installation of charging infrastructure across the state. In conjunction with the California Public Utilities Commission (CPUC), the program has spurred a growing EV ecosystem that likely would not have been possible without this partnership. California now has seen nearly half a million electric vehicles sold cumulatively in the state, and with more long range and lower priced vehicles coming onto the market, the public charging infrastructure for electric vehicles becomes even more important. In this quarter, 291,069 fast charging sessions were delivered on the EVgo settlement chargers in California, a 15% increase from Q2 2018. These sessions delivered 4,409,171 kWh of electricity, a 15% increase from Q2 2018. At this pace, EVgo is on track to double the annual kWh that was delivered in 2017.

As of September 5, 2018, (the Reporting Date), EVgo had a total of 218 Freedom Station sites either constructed or under development in the settlement service territory. Of these, EVgo has 201 qualifying Freedom Stations in operation. Among those, 21% are located in qualified low-income areas (by income-ranked PUMA), exceeding the 20% commitment, and serving a broad demographic range at places where they shop, meet, and relax locally, including grocery stores, shopping centers, and malls.

During the reporting period, EVgo made significant progress towards meeting its regional targets with fifteen (15) Freedom Stations in the LA Basin and one (1) additional site in San Diego. With a total of eleven (11) sites under contract, efforts to accelerate the utility application and permitting processes have proven to be effective in expediting EVgo's timeline to enter the construction phase of a project. This schedule will allow for construction starts to be sequenced in Q4 2018.

EVgo has made significant advances in the site development of high-power charging plazas (HPCPs) which are designed to benefit communities with high multifamily housing population density. Eight (8) sites have an executed host agreement, and 4 of those are in permitting as of the reporting date, with others quickly following in kind. Additionally, EVgo has selected a research partner to develop and conduct a study to measure and review the impacts of HPCP deployment on the surrounding community, especially as it relates to apartment dwellers and other drivers without access to home charging.

¹ Capitalized terms not otherwise defined herein shall have the meaning ascribed to such terms in the Long-Term Contract Settlement Agreement (the "Agreement").

EVgo and NRG are on schedule to deliver the Make-Readies volumetric building requirement of 6,875 Make-Ready Stubs at this time. Overall, EVgo has 794 Make-Readies Sites under contract, representing 6,879 Make-Ready Stubs. Of these, 6,119 Make-Ready Stubs have been installed at 721 sites. One hundred-fifty (150) of these Make-Ready Stubs were added in the preceding quarter. EVgo anticipates completing the construction queue later this year.

All Technology Demonstration funds have been allocated, and the three projects are underway. Specific updates for Technology and Opportunity Projects are provided in the corresponding section below.

NRG and EVgo continue to provide regular updates to the CPUC on challenges and improvements as the buildout continues. NRG and EVgo thank the Commissioners and the staff for their shared commitment to building out public charging infrastructure to remove barriers to EV adoptions for more Californians across geographies and demographics.

INSTALLATION OF PUBLIC EV CHARGING STATIONS (FREEDOM STATIONS)

As of the Reporting Date, a total of 218 Freedom Station sites were either completed, under construction, or in development.

The table below summarizes Freedom Station progress throughout the term of the Agreement:

<i>DC Fast Charging Station Progress</i>	Year-End 2013	Year-End 2014	Year-End 2015	Year-End 2016	Year-End 2017	2018		
						Q1	Q2	Q3
Sites under Construction	5	16	11	8	0	0	0	4
Sites Completed	10	56	105	161	200	200	200	201
Completed Sites w/ SAE Combo		23	105	161	200	200	200	201
Completed Sites w/ working credit card readers		3	105	161	200	200	200	201
Completed sites with credit card readers and SAE combo		2	105	161	200	200	200	201
Cumulative Settlement Target	40	100	160	200	200	200	200	201

During this Reporting Period, EVgo completed one (1) Freedom Station in the LA basin and energized a Freedom Station in San Diego. Further, EVgo funded three (3) additional station upgrades to Settlement stations, replacing a CHAdeMO-only charger with dual-standard (CHAdeMO and CCS Combo) fast chargers for a total of 21 swaps completed to date. Significant progress was also made securing site host agreements and moving forward on preliminary engineering and design for additional Freedom Stations in addition to the four that commenced construction during this timeframe. Completed Freedom Stations as of the Reporting Date are listed in [Appendix A](#).

Station Distribution

The Agreement requires a minimum number of Freedom Stations in each of four geographic regions. The table below summarizes the geographic distribution requirements and progress as of the Reporting Date.

<i>Geography</i>	Required	Completed	Percentage	Remaining Requirement
LA Basin	110	95	86%	15
SF Bay Area	55	69	125%	Complete
San Joaquin Valley	15	15	100%	Complete
San Diego County	20	19	90%	1
Other PG&E ² Counties	-	3	-	-
Total:	200	200	-	16

As seen in the preceding table, the Minimum Freedom Station Count has been fully met or exceeded in the SF Bay Area and the San Joaquin Valley. Current exceedances will contribute to meeting requirements of the anticipated Freedom Station Savings event.

Site Development

During the Reporting Period, EVgo was focused on the regional freedom station target in the LA basin. Efforts to initiate the utility application and permitting process concurrent with other work has proven to be an effective means of expediting EVgo's timeline to enter the construction phase of a project. In Q3 2018, EVgo began construction on four (4) Freedom Stations in LA Basin, one (1) of which was completed and energized in the same quarter.

As of the reporting date, EVgo executed eight (8) additional host agreements for Freedom Station sites in the LA basin, seven of which are already in permitting. The remaining four (4) sites planned for the LA basin and one (1) site in San Diego are being actively considered in EVgo's pipeline. This schedule will allow for construction starts to be sequenced in Q4 2018.

Based on current projections, EVgo anticipates having a Freedom Station Savings Event (as defined in the Agreement) with the same budget for 200 Freedom Stations and has begun site planning of additional Freedom Stations as required, with five (5) sites under contract in the SF Bay Area and additional sites in active negotiations across multiple geographies. While EVgo continues to pursue the development of Freedom Stations for the Savings Event, these sites are not being prioritized over our geographic requirements in LA Basin and San Diego.

² The First Amendment to the Long-Term Contact Settlement and Release Section (A) 1 allows the excess of the minimum Freedom Station count to be installed in locations reasonably expected to benefit SCE, SDG&E and PG&E ratepayers. This table reflects the updated classification of those sites, formerly grouped in the San Francisco Bay Area. This update is also reflected in Appendix A.

Low-Income PUMA Distribution

Forty-two of the 200 fully operational Freedom Stations are in low-income PUMAs: 16 in the San Francisco Bay Area, 18 in the Los Angeles Basin, 4 in San Diego County, and 4 in the San Joaquin Valley. They represent 21% of all operational sites, exceeding the goal of 20% in this category. The table below summarizes the low-income PUMA distribution and progress as of the Reporting Date.

<i>Geography</i>	Build Obligation	PUMA Minimum Requirement	Operational PUMA	PUMA %
LA	110	22	18	16%
SF	55	11	16	29%
SD	15	3	4	27%
SJV	20	4	4	20%
Other Counties	-	-	-	-
CA- all	200	40	42	21%

EVgo is prioritizing the development of the four outstanding PUMA qualified sites in the LA Basin; EVgo has executed host agreements with two sites, of which one is under construction. EVgo is in active negotiations with city planning offices regarding municipal sites on the remaining two PUMA qualified Freedom Stations in the LA Basin. Additionally, EVgo's site acquisition team is continuing to pursue and prioritize other potential PUMA qualified sites in the interest of both redundancy and a mutually shared goal of delivering public charging infrastructure to a diverse cross section of Californians.

Assessing Freedom Station distribution by income classification of PUMAs is a device that the CPUC and NRG developed for the settlement agreement because no other standards existed at the time. Since then, the Office of Environmental Health Hazard Assessment (OEHHA), on behalf of the California Environmental Protection Agency (CalEPA), developed the California Communities Environmental Health Screening Tool. CalEnviroScreen is a screening methodology that can be used to help identify California communities that are disproportionately burdened by multiple sources of pollution. CalEPA has used the tool to designate California communities as disadvantaged pursuant to Senate Bill 535.

While not required by the Settlement, applying CalEnviroScreen to the Freedom Station distribution for information purposes, as requested by CPUC, shows nearly the same number of qualifying sites (43 out of 200), with a slightly different distribution than the PUMA communities. NRG and EVgo will continue to assess the distribution by this standard in coming reports to align the state's environmental justice standards with the settlement infrastructure.

INSTALLATION OF HIGH-POWER CHARGING PLAZAS (HPCP)

As part of the Second Amendment to the Long-Term Contract Settlement, EVgo is committed to building ten (10) high-power charging plazas to serve the charging needs of residents of multi-family housing.

These charging plazas will meet the following criteria:

- At least three (3) 50kW (or higher) DC Fast Chargers
- Support both the CHAdeMO and SAE Standard
- Located in the top 50% of California Public Use Microdata Areas (PUMAs) ranked by percentage of residents in multi-family housing
- Distributed with a goal to serve drivers throughout the State of California, including in both Northern and Southern California
- These stations shall be distributed throughout the State of California, including 20% of stations installed in qualified low-income areas (by income-ranked PUMA).

As of the Reporting Date, EVgo has executed contracts for eight (8) high power charging plazas, six (6) of which are in permitting. Further, EVgo has won an RFP for an additional site and is planning to upgrade an existing Freedom Station into a high-power charging plaza which will meet the requisite minimum station count. As discussed extensively with the CPUC staff, the site development processes for these sites have been considerably more difficult than traditional Freedom Stations given their increased footprint and power needs in high-density multi-dwelling populations. The site development on high power charging plazas represent the culmination of 18+ months of exploration of sites with local governments or commercial real estate partners and shepherding projects through city and utility planning offices while there had heretofore not been a template for this kind of development. EVgo has played an essential role developing the market and collaboratively working with cities and utilities to identify paths forward on these projects.

Many of these stations will exceed the minimum charger count and power levels. For example, the contracted stations represent thirty (30) DC fast chargers, 11 of which are planned to be 50kW chargers, 16 of which will be 80kW chargers, and 3 of which will be 150kW chargers. EVgo is projecting a savings event which could allow an additional 5-8 stations constructed for the same budget. This savings event would represent at minimum 15-21 additional chargers, and likely more, based on the available configurations for sites in EVgo's high power charging plaza pipeline.

During the reporting period, EVgo selected a research partner to evaluate the extent to which these charging plazas are serving the multi-family segment. The contract is currently being finalized. This study is planned to commence following the energization of the first charging plaza and run through 2019.

HPCP Progress Distribution

The table below summarizes the geographic distribution and progress as of the Reporting Date. While the distribution of the HPCPs differ from that of the Freedom Stations, the geographically defined territories for the LA basin, SF Bay Area, San Joaquin Valley and San Diego county have been applied to demonstrate the station distribution. The geographic distribution of HPCP

is aimed to serve drivers throughout the State of California, including in both Northern and Southern California.

EVgo is in additional active contract negotiations for HPCP deployment, targeting sites in Los Angeles Basin and San Diego County to balance the distribution of HPCP sites in the State.

<i>Geography</i>	Executed Contract
LA Basin	3
SF Bay Area	4
San Joaquin Valley	-
San Diego County	-
Other PG&E Counties	1
Settlement Target	8

Low-Income PUMA Distribution

Two of the HPCP sites under contract are located within a low-income PUMA. There are additional sites within EVgo’s pipeline to deliver additional PUMA qualified sites.

INSTALLATION OF MAKE READY STUBS AND MAKE READY ARRAYS

Status of Make-Readies Sites

Overall, EVgo has 794 Make-Ready Sites under contract, representing 6,879 Make-Ready Stubs. This build will exceed the minimum requirement of 6,875 Make-Ready Stubs required by the settlement. To date, 6,119 Make-Ready Stubs have been installed at 721 sites, as set forth in [Appendix B](#).

NRG and EVgo have had success in reaching disadvantaged communities with this program. For information purposes, CPUC staff requested an analysis of distribution based on the CalEnviroScreen (CES) standard, which did not exist at the time the settlement was enacted. The distribution is reported in the chart below.

Distribution of Make-Readies by CalEnviroScreen Criteria

Region	CES Qualified Sites			Percent of total sites			CES Qualified Stubs			Percent of total stubs		
	MDU	WP	All	MDU	WP	All	MDU	WP	All	MDU	WP	All
LA	46	30	78	32.2%	21.4%	26.2%	246	228	478	24.7%	19.1%	21.0%
SD	13	8	22	18.3%	13.3%	14.9%	129	54	191	20.8%	10.7%	14.9%
SF	6	19	35	5.1%	22.9%	13.8%	57	198	330	5.1%	28.2%	14.5%
SJV	0	12	12	0.0%	42.9%	38.7%		112	112	0.0%	43.1%	37.8%
Total	65	70	147	19.5%	22.2%	20.1%	432	592	1111	15.6%	22.2%	18.2%

Another way to consider make-readies distribution to disadvantaged communities or residents is to consider the percentage of multi-dwelling unit (MDU) properties (and stubs) that have deed-

restricted housing units. By this standard, the results benefit disadvantage communities at 31.9% of total operational MDU stubs. This is due in part to inclusionary housing requirements in many California communities, where mixed-income housing in single properties is a norm. Thus, residents of low-income housing units as measured by the median income in the region have reasonable access to the stubs built in this program. That being said, NRG and EVgo have found that a large number of low-income Californians do not have access to regular off-street parking; accordingly, public fast charging remains a critical priority for expanding EV access across demographics.

	Deed Restricted Sites	Percent of Total Operational MDU Sites	Deed Restricted Stubs	Percent of Total Operational MDU Stubs
LA	76	53.1%	503	50.5%
SD	16	22.5%	113	18.2%
SF	20	17.1%	262	23.3%
SJV	0	0.0%	0	0.0%
CA - All	112	33.9%	878	31.9%

Pursuant to Section 4(b)(vi)(B) of the Agreement, EVgo has established a website which identifies each installed Make-Ready Array’s location and Start-Up Period expiration date. See <http://www.evgo.com/california-rev-progress/>.

USAGE DATA

EVgo completed 291,069 fast-charging sessions in the Reporting Period at Freedom Station sites and dispensed over 4,409,171 kilowatt-hours of electricity.

This translates to 13.78 million miles driven on electricity in this quarter, displacing 567,023 gallons of gasoline (assuming 3.125 miles per kWh and 24.3 mpg).³ This equates to 3,127.76 MT of CO₂ emissions avoided,

Confidential Appendix C, the original raw usage data for the Reporting Period, will be submitted to the CPUC separately in electronic format.

³ 3.125 mi/kWh derived by AFDC from sales weighted average of 2016 model year vehicles with sales in 2015: 2015 sales from "U.S. Plug-in Electric Vehicle Sales by Model" (<http://www.afdc.energy.gov/data/vehicles.html>); MPGs based on 24.3 MPG CAFÉ Standard (http://www.afdc.energy.gov/vehicles/electric_emissions_sources.html).

Stationary Storage Plus Electric Charging (SSPEC)

Project Background

The Stationary Storage Plus Electric Charging (SSPEC) project uses stationary batteries in a technology demonstration application to reduce the cost of operating DC fast chargers (Level 3) and alleviate strain on the grid.

The SSPEC project has successfully:

1. Deployed a test site with microgrid components, including battery storage, solar generation, EV charging infrastructure, and site control technology.
2. Tested various configurations of distributed energy resources and electric vehicle DC fast chargers.
3. Analyzed results from operation of the SSPEC site and historical data from EVgo's charging station network to identify load profiles, potential sites, and utility territories which can benefit most from stationary storage and/or generation on site.

Upon successful economic and operational demonstration, EVgo intends to commercialize these technologies and integrate them into its broader DC fast charger network as appropriate.

The SSPEC work will enable improved deployment of DC fast chargers by EVgo and third parties at a wider variety of locations. Stations deployed with stationary storage can have a lower total cost of ownership to property owners and electric vehicle service providers (EVSPs) alike.

Q3 2018 Activities:

- EVgo has launched its first commercial installation of second-life battery storage at a public DC fast charging station integrating second-life BMW i3 batteries to store energy from the grid generated during peak solar hours and later use that stored energy to fast-charge EVgo customers during periods of high demand. In addition to reducing curtailment of solar or wind power, a benefit to all grid users.⁴
- Received PG&E Permission to Operate for EVgo's 2nd life battery installation at Union City station.
- Energy storage system at Union City received dashboard upgrade to increase algorithm granularity to 15-minute interval sensitivity.
- Hosted Hawaiian delegation at SSPEC site to share information about EV charging technology.
- Project partner Kisensum was acquired by ChargePoint in June 2018.
- EVgo high-power charging station in Baker, CA, identified as site for installation of 2nd and 3rd BMW Second Life Battery installations.

⁴ <https://www.electrivedrive.com/2018/07/11/evgo-bmw-launching-2nd-life-battery-project/>

Q4 2018 Upcoming Activities:

- EVgo / BMW meeting to plan further Second Life battery activities based on success of CPUC Technology Demonstration project.
- Deploy OCPP 1.6 on BTC chargers at UCSD and implement new dynamic site demand cap functionality.
- Turn on fourth charger at SSPEC site.
- Receive PG&E final Rule 21 Interconnection approval and permission to operate.
- Update call with UL on 1974 standard development.
- Installation of remaining two 2nd Life energy storage units at EVgo's Baker, California site.

For further details, see confidential Appendix D-1.

EV Storage Accelerator (EVSA)

Project Summary

The EV Storage Accelerator (EVSA) aims to demonstrate vehicle-to-grid (V2G) technology as a low-cost energy storage resource. The project will use nine vehicles for the demonstration, three Honda Accord Plug-in Hybrid electric vehicles (PHEV) and six Nissan LEAF battery electric vehicles (BEV). The four primary goals of EVSA are:

- Create a test environment for two major automakers, Nissan and Honda, to gain experience with V2G technologies and prepare them for a further commitment to the technology.
- Advance product readiness for bidirectional inverters, including listing standards and product certification.
- Identify use cases for V2G and test vehicles against those use cases.
- Inform public policy around the system, ratepayer and customer benefits of V2G.

For a more detailed report on the scope of work and related activities, please refer to the Final Scope of work – October 2015 as well as the Revised EVSA Scope of Work – April 2018.

Q3 2018 Activities

Use Cases: The EVSA Project Team continued to work on executing the outlined use cases. The first use case, Interconnection, was executed in full on April 24th.

The second use case, Transformer Upgrade Deferral, completed testing of the four test vehicles (3 Chrysler Pacifica PHEVs and 1 Honda Accord PHEV) in June and July. The demonstration tested the vehicles responding to an array of input signals including a load signal from a local transformer, a solar generation signal and a modeled automated generation control (AGC) signal. The data collected was analyzed by E3 and EPRI and included in the final draft report submitted to the California Energy Commission for review. A final report will be circulated to the CPUC and the public in Q4 2018. The site for this use case at UCSD was decommissioned in early August and the solar input borrowed from the SSPEC site was returned to its original configuration.

The third use case, Emergency Power Back-Up, continued to be put on hold to focus on the administrative tasks required to formally extend the EVSA project until Q3 2019 in order to accommodate the request of the CPUC Energy Division to collect a year's worth of data. This included reviewing and extending contracts with UCSD, Honda and the project drivers as well as formally revising the project's scope of work for CPUC approval.

The fourth use case, quantifying the Value of V2G, continued to make progress in Q3. All 8 of the project vehicles were successfully executing vehicle-to-grid responses based on the California Independent System Operators (CAISO) historical Automated Generation Control (AGC) signal sent from the Nuvve aggregator. The overall hardware/software system continued to be fine-tuned for optimal operation and data quality in Q3 and a bidding strategy was decided

upon for execution starting in September. Additional meetings were held with E3 to further discuss strategy and content for their analysis of the data collected.

Deliverables: The Project Team submitted the following deliverables in confidential Appendix D-2 of the Q3 2018 quarterly report: (1) Charging Station Metrics Report. No other deliverables were due this term following the project extension request by the Energy Division.

Administrative: The EVSA Project Team revised the Scope of Work for the EVSA project in Q3 2018. It has yet to be formally submitted to the CPUC Executive Director for review.

Q4 2018 Activities

Q4 2018 will focus almost exclusively on the data analysis required for the following deliverables: Interim Report on Actual and Simulated Revenue from V2G, Interim Data Analysis Report Module, Interim Project Benefits Update.

For further details, see confidential [Appendix D-2](#).

Extreme High Power DC Charging Station

Project Background

Automakers are continuing to increase range of EVs by increasing battery capacities, e.g. the late-2016 release of the all-electric Chevy Bolt with 238 miles of range and announcements of soon-to-be-released vehicles of similar and longer range. To maintain a consistent customer / EV driver experience regarding charge duration and SOC (State of Charge) completion percentage, DC EVSE infrastructure will likely increase the power level of charging infrastructure (i.e. increase the rate at which energy is delivered into the electric vehicle battery).

This project is intended to bring auto OEMs, EVSE, and cable manufacturers together to demonstrate and facilitate testing and development of standards and equipment. The project will do the following:

- Deploy first of its kind EVSE infrastructure capable of high-power DC charging (300+ amps).
- Test with auto OEMs and EVSE providers to allow for test bed and development of standards.

Q3 2018 Activities

EVgo's high-power charging station in Baker, CA, became operational in Q2 2018. The site has been open for public charging since June 18, 2018. The site came online with (2) ABB 50 kW chargers since the high-power production equipment from our manufacturing partners ABB and BTC was not yet ready. Since site commissioning EVgo has received ABB's high-power equipment and the BTC equipment is scheduled for delivery at the end of September.

Jaguar I-PACE charging at 50 kW charger at the Baker site.

The (2) ABB prototype high-power charge posts were not commissioned in Q3 2018 because there was concern around the connector used on the prototypes. The connector had an issue previously so despite installing the 150kW charger, EVgo decided out of an abundant concern for safety not to energize the prototype with the connector in question.

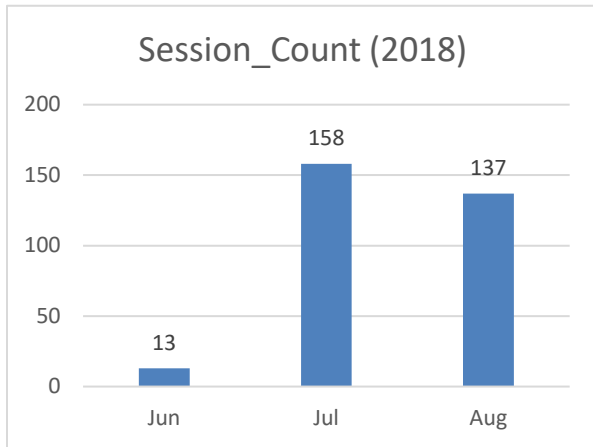

ABB prototype charger.

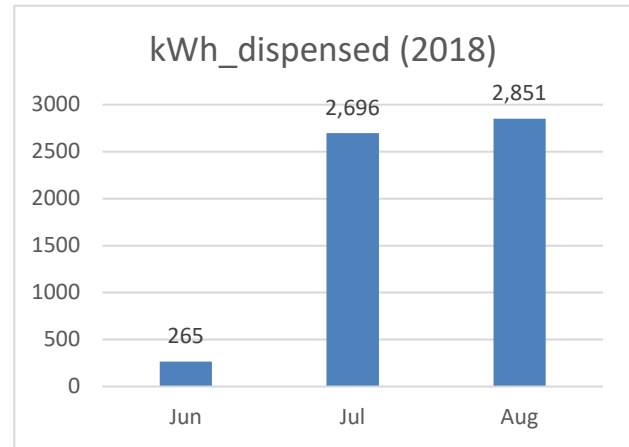

Phoenix Contact connector on prototype.

EVgo received ABBs high-power equipment in Q3 and has contracted with MaxGen Energy Services to install the high-power chargers at the Baker site. MaxGen Energy Services was chosen due to their specific expertise with ABB high-power equipment and their competitive bid. Installation of both the ABB and BTC high-power equipment is scheduled for beginning of October 2018 for site to be operational and open to the public with high-power equipment in November 2018.

Final charger installation at the site will include (2) ABB 50 kW chargers, (1) ABB 150 kW charger, (2) BTC 200 kW chargers, and (1) ABB 350 kW charger. This electric vehicle charging station will come online with the first 350 kW charger in California and will be available to our original equipment manufacturer (OEM) charging partners for vehicle testing.

Baker site session count through August.

Baker site kWh dispensed through August.

EV OPPORTUNITY PROJECTS

The EV Opportunity Program under the Agreement consists of \$4 million toward “...Enhancing the appreciation of the social benefits of electric vehicles and creating opportunities for residents of underserved communities to benefit from expanded use of electric vehicles.” More specifically, the EV Opportunity Program Amount may be used to fund: a) the deployment of electric vehicle charging infrastructure to support electric vehicle car-sharing projects, in particular in low-income areas within the State of California; b) an EV job training program; and c) other projects consistent with the objectives of Section 4(d)(ii) of the Agreement.

The two approved Opportunity Programs, Green Raiteros and Equal Access Charging Hub (EACH), were established in 2017. Summaries of these programs, progress to date, and ongoing project schedules are included herein.

Green Raiteros

Project Background

The Green Raiteros Pilot Project is being executed in partnership with the San Joaquin Valley Latino Equity Advocacy & Policy Institute (the LEAP Institute), the Fresno County Rural Transit Authority (FCRTA), the Shared Use Mobility Center (SUMC). The Green Raiteros Pilot builds on an existing grassroots ridesharing program. The Raiteros are retired Valley farmworkers who offer rides for people without access to transportation to and from work. Green Raiteros expands access to carbon-free mobility in the Central Valley by strategically and sustainably introducing EVs to the Raiteros' services. EVgo worked with the LEAP Institute to apply for the 11th Hour Project Just Transit Challenge, a fund dedicated to reducing emissions while increasing equitable transportation options. This funding was awarded in Q2 2017 and will be used to acquire two EVs, a 2018 Chevy Bolt and a used BMW i3s for the Green Raiteros Pilot Program.

In 2017 accomplishments for Green Raiteros included: executing the program kickoff; forming a stakeholder advisory committee; establishing the LEAP Institute non-profit business status to manage Green Raiteros; and focusing the pilot program on infrastructure and business capacity expansion. For the 18-month period of support provided by EVgo's settlement with the CPUC, the LEAP Institute will administer budget items pertaining to staff hiring and business model development, establishing a sustainable business plan that allows for ongoing funding and support from outside sources. Green Raiteros has worked to identify future funding sources; With a competitive proposal submitted to the Fresno Transformative Climate Communities, a project administered through the Strategic Growth Council, the Clean Shared Mobility Network will provide for ten additional carshare stations, including a minimum of 5 level 2 and level 3 chargers each, and 42 electric vehicles that will be leveraged to expand existing Green Raiteros' service in 2019. This proposal aims to enhance electrification and shared mobility strategies in Fresno and will be funded at over \$9 million. Q1 2018 operational development included a finalized business plan submitted by SUMC, hiring of first Green Raiteros Operations Manager, multiple advisory committee meetings with update reporting, fully executed lease, executed construction contracts and driver engagement.

Q3 2018 Activities

In the past quarter, the Green Raiteros Program, has transformed from a business model to a ride sharing service in Huron. A group of dedicated drivers and the new headquarters are at the heart of the transformation. In the small rural community of Huron, CA, the new headquarters has taken to transforming a metal quonset hut, a three-bay garage into a two-story office, community conference room and public charging hub for electric vehicles infrastructure for ten (10) future Level 2 stations. The Huron community was given a sneak preview of what is to come at an open house held in Q3 2018.

A new electric Chevy Bolt was purchased with 11th Hour Foundation funds. A second vehicle, a used BMW I-3 is in process of being procured with additional funding from the 11th Hour

Project - Just Transit Challenge, a fund dedicated to reducing emissions while increasing equitable transportation options.

The EVgo Fast Charging network in Selma, Visalia and Fresno has been instrumental for the preliminary routes being designed by the Green Raiteros team to rollout the SNAP app called Turnkey Trips. The SNAP organization is working on deployment of the V1 mobile app that supports GPS tracking and tracking of trip events. Drivers can manually enter riders, as well as select from a list of riders from a Green Raiteros dispatcher. A trip history feature is available that can be customized to have a 'personal mode' when a driver is not transporting riders. The Turnkey Trip app for Green Raiteros is being customized with Spanish translation. The Chevy Bolt has started to be used for training sessions at the local community center, school and public health office.

The newly hired Operations Director has held over eight (8) informational sign ups at the various locations around Huron and the surrounding area. The list of volunteer drivers for the training sessions is growing. The non-profit Green Raiteros program will provide cost-effective transportation to underserved, farmworker communities to help increase their economic and health opportunities while reducing air pollution by using electric vehicles. The informal "Raiteros" transportation system is made up of individuals (often retired or semi-retired) offering rides to neighbors who lack automobiles for trips into Fresno and to other long-distance locations. The strategically located certification trainings are being planned to bring in the group of not connected drivers to creating a group of trained ready to be dispatched network of drivers. The consulting services of the Shared Use Mobility Center (SUMC) has continued to expand their role in formalizing the business structure of the Green Raiteros Program.

The formalized structure of the Green Raiteros that has continued to evolve this quarter with an expanded Advisory board, focused on additional employees, insurance, accounting and employee payroll systems. The advisory board recognizes the benefits to the community and is therefore designing the ride share program to pay drivers a small amount based on the miles they travel. Green Raiteros will provide insurance and certify all drivers and vehicles used. Volunteer drivers will be reimbursed for their miles driven and will not have to worry about the burdensome requirements for launching their own business enterprise. A new advisory member, Beneficial State Bank is designing a community programs to educate the general public on the benefits of purchasing EV's. The program will be shared at Green Raiteros trainings and informational GR project meetings.

Employee postings for a local dispatcher and a local technician are posted with interview being conducted. A Bookkeeping and Payroll firm are under contract in Q3.

The contracted public relations firm has focused on the upcoming Green Raiteros Launch and Press Conference to be held at the new office and maintenance shop in Huron in Q4. The new logo for Green Raiteros, invitations, speaker list and press release have been key items on PR project schedule in Q3. The Ready for EV (REV) make ready electrical infrastructure for the (10) Level 2 future chargers has been completed. The chargers have been ordered under the ChargeUp! Program. The Level 3 DCFC has made it through tenant and landlord approval at a

location in central Fresno. Engineered drawing request has been made to design the install. Additionally, an alternative site is in discussion located in the City of Huron.

Q4 2018 Activities

Green Raiteros, is planning a media-friendly public launch October 12, 2018 which will include regional political figures, a Raitero driver, and all partners.

At launch in Q4, Green Raiteros will have 2-3 Raiteros providing two one-way trips per day. Green Raiteros will own two electric vehicles and employ conventional vehicle drivers who will find riders through a telephone dispatch, and a walk-up desk at the Green Raiteros Operations and Maintenance Center in Huron and a phone app in beta test mode. The Maintenance Center will have (10) installed operational Level 2 Electric Vehicle Charging stations open to the local Huron community and the EV driving public with extended office hours in downtown Huron, CA. SUMC will continue to lend their expertise to roll out full the organizational structure.

Outreach and grant proposal submission with a new grant writer on board with be a priority in Q4. The strategically located driver training are being planned to bring in the group of not connected driver to therefore create a network of trained ready to be dispatched network of drivers. To fully understand the need this program will be serving, you can look at Huron and other farmworker communities in the region and see they depend on Fresno for many needs; hospitals, county services, higher education, and shopping. But travelling 59 miles to Fresno can be difficult for this farmworker community.

Green Raiteros intends to enhance the one-bus-a-day trip that goes from Huron to Fresno each morning. The trip makes more than a dozen stops along the way and takes three hours each way. For people who don't own automobiles, even a doctor's appointment can become a major burden. The lack of transit in rural California is a huge obstacle to economic opportunity limiting access to employment, education, health and social services, as well as healthy food. Despite the informality of the Raiteros' service, it fills a critical niche in under-resourced rural markets by providing affordable transportation to essential appointments for families in the San Joaquin Valley.

EACH

Project Background

The focus of the Electric Access Charging Hub (EACH) project is to create EV access and job opportunities to underserved communities. EVgo is developing seven EV-charging hubs in low-income communities of the San Francisco Bay Area, Los Angeles, and San Diego that will serve the public as well as electric carshare and rideshare vehicles. The EACH project aims to support EV carsharing and ridesharing, create job opportunities, provide publicly available EV fast charging, and spur the adoption of electric vehicles in underserved neighborhoods.

In 2017, EVgo engaged in preliminary partnership and site development discussions with entities including: the city of San Francisco, the city of Oakland, the city of Richmond, Los Angeles

Department of Transportation, Los Angeles County Metropolitan Transportation Authority, and Grid Alternatives. In 2017 accomplishments for EACH included: increased engagement from project advisor the Shared-Use Mobility Center (SUMC) and proposed formation of partnerships with the Center for Sustainable Energy (CSE) to oversee marketing and outreach strategies, coordinate with community-based organizations and local nonprofits, and conduct program evaluation. In 2018 Q1 the proposed partnership with CSE dissolved due to CSE expanded workload with other programs. SUMC increased engagement in EACH project administration, working to identify potential partners and connect EVgo with additional site identification in all three regions. This work culminated in a state of the industry memo to EVgo, highlighting recommendations on carshare partnership models and site suitability, a synthesis of findings from stakeholder interviews, and potential alignment with additional funding sources.

Q3 2018 Activities

In the past quarter, EVgo and SUMC took meetings with community-based organization (CBO) whose work or focus areas included transportation, the environment and social justice. EVgo met with the Greenlining Institute (San Diego – lead), Groundwork (San Diego), the Social Justice Learning Institute (Inglewood), TransForm (Bay Area), and the Environmental Health Coalition (San Diego). This engagement served to introduce the EACH program to important stakeholders for disadvantaged communities which will be prospective homes to the EACH hubs. Additionally, our discourse served to identify key barriers in disadvantaged communities' ability to access or engage in electrified transport and to inform EVgo's site strategy for these EACH hubs.

Stakeholder engagement: Some of the key messages highlighted in our meetings real concerns regarding lack of affordable housing and lack of public transportation and concerns that EV infrastructure leads to gentrification and increased prioritization of privatized transport over public. On the other hand, the CBOs were supportive of education about the benefits of EV's and resources, but feel the financial incentives are all out of reach. Options like short term rentals and carshare were shared as avenues that EVgo is pursuing formal partnerships as a means of bringing down the entry-cost to driving or riding in an electric car. This has highlighted how important the marketing and outreach campaign portion of the EACH program will be, and EVgo is pursuing this path as an opportunity to collaborate further with CBOs.

Program Evaluation: The shared economy and shared mobility are emergent trends that policy makers, community organizers and businesses are recognizing as having transformational change in neighborhoods. The EACH program can serve as a policy pilot and in that spirit, EVgo has selected the Shared Use Mobility Center (SUMC) from a competitive RFP to evaluate the success of the program.

SUMC will conduct a study to help define key performance indicators as a basis for evaluation as well as to address three main questions:

- How much the project improves accessibility to electric vehicles and electric vehicle services?
- What are the direct environmental impact of GHG reduction?
- What are secondary effects on vehicle ownership mobility and unemployment?

The study is planned to commence following the energization of the first charging plaza and continue throughout 2019.

Marketing: EVgo released an RFP for the marketing and outreach campaign and plans to select a partner in early October. Given the importance that the outreach and education is targeting disadvantaged communities that will be served by the EACH hubs this is a prime time for the development of the scope of work, which will include community based events, collaboration with community based organizations as well as creative outreach that is considerate of the multilingual and multicultural neighborhoods that this program will reach. Additionally, EVgo anticipates the partnerships referenced below to boost other marketing and outreach efforts.

Site Development: EVgo has secured contracts with four (4) of the seven (7) required EACH hubs. EVgo is awaiting determinations from the CPUC on acceptability of two (2) of these sites which both fall less than a half-mile from a defined disadvantaged community census tract and would serve the neighboring environs. EVgo also has three additional sites in active negotiations with city planning offices.

Carshare and Rideshare Partnerships: A key element of the EACH program is to develop carshare and rideshare partnerships that will help expand access to disadvantaged communities served by the EACH hubs. EVgo has reached out to rideshare and carshare companies with whom the company has previously worked as well as new companies. For each of these, EVgo has shared memoranda of understanding seeks to formalize these partnerships in Q4.

Q4 2018 Activities

In Q4 2018, EVgo expects that the work from the past 18 months will take form to launching the EACH program. Pending approval of the aforementioned two EACH sites adjacent to target census tracts, EVgo expects at least five of the seven sites to be finished construction and pending energization. EVgo will select a marketing firm who will kick off the creative and event planning for station openings, community events, and educational outreach that will expand access and awareness of the DC fast charging infrastructure. EVgo will formalize partnerships with carshare and rideshare companies and plan to announce and begin the implementation of programs to expand EV access in disadvantaged communities. Finally, the initial meetings of the program evaluation will take place and create key performance indicators for which EVgo and its project partners can be evaluated over the course of 2019.

Electric Vehicle Charging Station Project – Technology Demonstration Funds

Project Title: Stationary Storage Plus Electric Charging (SSPEC)
(Formerly the Battery Energy Storage System or BESS and Modular Micro-Grid DC Charging)

Covering Period: July 1, 2018 through August 31st, 2018

EVgo Contacts:
Bill Ehrlich
Project Manager
Phone: (651) 324-9127
Email: Bill.Ehrlich@EVgo.com

CPUC Technical Monitor:
Name: Audrey Newman CPUC
Energy Division Analyst,
Electric Vehicles Office: (415)
703-3175
Email: audrey.newman@cpuc.ca.gov

The following information is confidential and protected material and may only be provided to those parties that have executed a protective order in the FERC proceeding approving the Long-Term Contract Settlement Agreement and the settlement of the EL02-60/62 Proceeding, Section 4(e)(ii)(4)(B). NRG retains an exclusive, non-public, proprietary right to such information for eighteen (18) months after the date of submittal to the CPUC, and during such time such information shall not to the extent permitted by law be subject to disclosure under FOIA or CAPRA.
